

Government Funding Now Available for Lean Pathology Industry improvements

How is the government helping businesses in improving your company's bottom line?

Vative can implement Lean pathology improvements at **potentially no cost to the company or significantly subsidised**

- ✓ **Nationally accredited training** in Certificate III, Certificate IV & Diploma in all industry sectors
- ✓ **Internationally Certified Leadership Training** (Lean Practitioner/Experts/Masters)
- ✓ Specific Federal and State funding for business improvement projects in specific industries

Vative Skills, Tools & Training + **Government Funding** = **Increased Knowledge & Business Profit**

Whether your business is new to Lean Health care or has already begun the journey, Vative can **tailor a solution** that will ensure your business makes positive changes to improve your business profitability, operations/service quality and team morale. By educating your teams with **structured and proven techniques**, Vative raises the level of employee skills in alignment with business goals and objectives.

What is Lean Pathology?

Lean is about speed, flow and the elimination of waste, and by applying the "Lean" principles in Pathology processes, could boost your company's competitiveness, efficiency and profit. Lean systems educate people; instil a culture in the work place and continuous improvement.

- Lean helps your business become more efficient and focusing on Value Added operations
- When waste is reduced or eliminated across the pathology operations, overall cycle time is improved, labour costs are reduced and quicker response to the patient & clinician is achieved.

How is Lean Pathology applied to your operations?

Although Lean originated in Manufacturing, these proven tools and techniques are also making equal impact in Pathology Operations Management. This is possible by focusing on core Lean activities required for effective business improvement and customising project objectives.

Outcomes from implementing Lean pathology;

- Lean systems allow Pathology to not only to be more efficient, but also faster and safer.
- Lean operations delivers care faster, reducing holding cost and provide superior patient satisfaction
- Lean Pathology means eliminating non-value added steps in the care of the patient process.
- Lean concepts in Pathology improves inefficiencies, eliminate unnecessary processing and administrative functions.

Competitive advantage and leadership in the Pathology industry can only be gained by applying Lean principles, in combination with vision, commitment, planning and collaboration.

Vative are able to offer realistic, simple and effective solutions which improve efficiency, culture and quality.

Vative Pathology Projects & Training Options

	<p>Value Stream Mapping (VSM) Provides business vision and unified planning (Vative are an authorised distributor of IGrafx Flowcharter & VSM Software)</p>		<p>Labour Balancing Analyses and optimises processes to ensure maximum output for minimum resource allocation</p>
	<p>Business Analysis & Benchmarking Assesses:</p> <ul style="list-style-type: none"> ✓ Lean Business Health Check ✓ Culture and Morale Surveys ✓ Quality Assessments 		<p>Standard Operating Procedures (SOP) Records valuable information about process settings and standard operation requirements.</p>
	<p>Professional Coaching Assists in developing individuals or teams to allow better focus on business objectives and goals</p>		<p>Mistake Proofing Teaches teams the techniques to design products and processes in a way that eliminates the possibility of quality issues</p>
